

Chris the DIY Guy

Kill it, Green it, DIY it.

What can we help you Kill or make Greener!

Cyper WSP **Roach Elimination Plan**

Kills all major species — German, American, Smokybrown, Asian, and Brown-Banded Roaches.

What You're Dealing With

Whether it's German, American, Smokybrown, Asian, or Brown-Banded roaches

— this plan eliminates every species common to Florida homes.

Cyper WSP delivers long-lasting wettable powder protection, **Gentrol IGR** halts reproduction, and **Cockroach Bait Gel** destroys the nest.

How We Know

Droppings, egg casings near appliances, or late-night movement along baseboards = confirmed infestation.

The Attack Plan

- **Cyper WSP** for fast kill and residual protection.
 - **Gentrol IGR** to break the breeding cycle.
 - **Cockroach Bait Gel** for internal colony elimination.
-

Initial Treatment — Day 1

Mix Solution:

- 2 packs Cyper WSP
- 1 oz Gentrol IGR
- 1 gallon of water

Mix thoroughly in a pump sprayer.

 Use within 24 hours.

 **Apply Indoors:** Spray along baseboards, under sinks, and behind the stove, fridge, and dishwasher.

Apply Garage & Exterior: Apply a 2-foot band around the foundation, eaves, vents, windows, and door frames.

Follow-Up Treatments — Days 7 & 14

Mix Solution: 1 pack Cyper WSP per 1 gallon of water

Apply: Repeat the same indoor and outdoor pattern.

Once under control: Continue every 2 months.

 **Bait Application**

 **Placement:** Small bait dots in:

- Cabinet hinges
- Under counters
- Pipe joints under sinks
- Cracks & crevices

 **Rate:** ~0.5 g every 2–3 ft (½-inch lines)

 **Maintenance:** Check every 15 days, replace dry bait.  Never spray over bait.

 **Storage:** Store Cyper WSP, Gentrol IGR, and Gel Baits in a cool, dry place out of sunlight.

 **Why It Works:** Spray kills what you see, IGR halts breeding, and bait wipes out the nest — complete shutdown.

Warranty & Conditions of Sale

DIY Pest & Lawn provides **NO WARRANTY**, express or implied, beyond the EPA-approved label.

All products must be used according to label directions. The buyer/applicator

assumes all risks if the products are used, mixed, or applied in a manner outside of the label directions.
