D-Fense NXT & Roach Bait Plan - Home and Vehicle

DIY Pest & Lawn – Application Instructions

Part 1 – Home D-Fense NXT & Roach Bait

D-FENSE NXT Aerosol

Application Instructions

1. Crack-and-Crevice Application

- Insert the injector tip into cracks, crevices, or voids where insects hide.
- Apply approximately 1 second of spray per injection.
- For long cracks: move the injector tip along the crack while spraying:
  - Light infestations: about 3 feet per second
  - Heavy infestations: about 1 foot per second
- Wall and cabinet voids: actuator up, 5–10 seconds per 3 cubic feet of void.

2. Spot Treatment

- Put the actuator in the down position. Apply to specific hidden areas like:
  - closets
  - around pipes
  - behind appliances
  - under sinks
  - behind baseboards
- Hold the can 12–15 inches from the surface.
- Apply for 1 second per 2 square feet.
- Spot treatments should not exceed 2 square feet in size.

Where to Treat with D-Fense NXT

- Behind refrigerators, stoves, and dishwashers
- Under sinks and around plumbing penetrations
- Cabinet voids
- Cracks and crevices
- Wall voids
- Behind baseboards
- Closets, door frames, windows, and hidden harborage areas listed on the label

---

Cockroach Gel Bait

Bait Application

1. Placement

Strategically apply bait to:

- cabinet hinges
- under countertops
- on piping under sinks
- inside cracks and crevices
- behind appliances
- along baseboards
- corners and hidden travel routes
- Put bait in different spots from where you sprayed D-Fense NXT. Never on or next to the spray.

2. Application Rate

- Apply approximately 0.5 grams of bait every 2–3 feet in lines about ½ inch long.

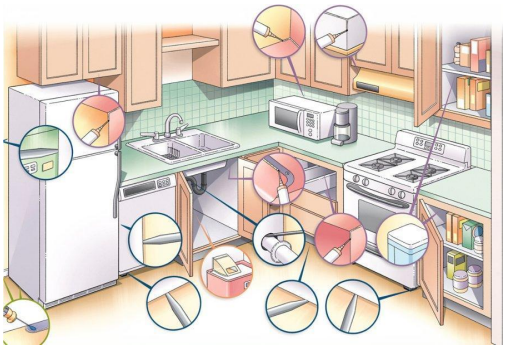

- Numerous small placements work better than a few large blobs.

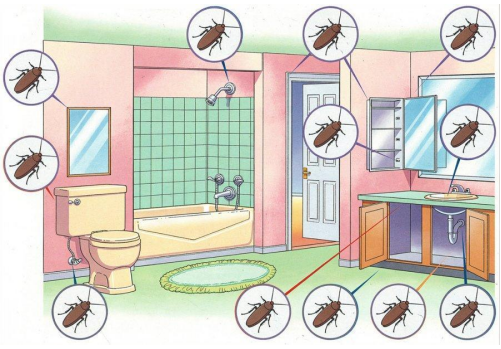

3. First Check

- Check bait within 24–48 hours
- In heavy infestations, roaches may begin feeding within minutes to hours
- If bait is being eaten hard, replace it fast

4. Maintenance

- Recheck bait every 2–3 days at first
- Once activity drops, check weekly
- Clean up dried, dirty, or consumed bait and replace with fresh bait
- Do not let old dried bait just sit there

Bait Stations

Why They Help

- Open bait on countertops or exposed areas can dry out in about 2–3 days
- In bait stations, bait can stay usable for about 5 days
- That gives roaches a longer feeding window and helps keep bait cleaner

Where to Use Them

- countertops
- inside cabinets
- under sinks
- visible protected areas
- places where open bait dries too fast

How to Use Them

- Put a small amount of bait into the station
- Keep station tucked along edges and travel routes
- Check it during your 24–48 hour inspection and refill as needed

Important Notes

- Treat the hiding spots with D-Fense NXT
- Place the bait where roaches feed and travel
- D-Fense NXT keeps roaches away from where it is sprayed, so never spray it on or next to the bait.
- Keep applications tight, targeted, and in hidden zones
- Do not put bait on food-contact surfaces
- Keep all products out of reach of children and pets
- Remove pets and birds, and cover fish aquariums before spraying.
- Do not spray up into the air. Point the spray away from your face.
- Test first on a hidden spot for staining. Do not spray plastic, painted, or varnished surfaces, or into electronics.
- Cover or remove food first. Do not spray food or food-handling surfaces.
- Do not let the spray get into any drain.
- Flammable. Contents under pressure. Keep away from heat, sparks, open flame, and pilot lights.
- Wash with soap and water after use.

Use in vehicles:

Peel the liner off the double-sided tape, stick it to the back of the bait station, and press the station onto your center console or dash. It holds through turns and bumps, peels off clean when you’re done, and never touches seats or fabric.

Part 2 – Vehicle D-FENSE® NXT for Vehicles

D-FENSE® NXT FOR VEHICLES

Kills Fast. Stop the Cycle. Shuts Down the Next Generation.

Roaches in the ride? Ants in the trunk? NOT ON OUR WATCH.

D-FENSE® NXT is your go-to for vehicle pest control with professional-grade punch:

- Kills fast with Deltamethrin for instant knockdown
- Two IGRs (Novaluron + Pyriproxyfen) break the life cycle
- Eggs don't hatch. Nymphs don't mature. Adults can't reproduce
- Effective against roaches, ants, spiders, fleas, and more

How to Use in Vehicles

1. Shake can thoroughly before use. Insert straw applicator for precision.
2. Spray short, controlled bursts into:
    - Floorboard edges
    - Seat track crevices
    - Under/behind glovebox
    - Trunk seams and spare tire wells
3. Avoid spraying electronics, vents, dashboard, or glossy plastics.
4. After spraying, ventilate vehicle for at least 30 minutes with windows or doors open.
5. Reapply every 6 months if activity returns or as a preventive measure.

Safety & Precautions

- Contents are flammable and under pressure – keep away from heat and open flame
- Do not spray while vehicle is running or if interior is hot from sun exposure
- Wear gloves when applying and wash hands thoroughly after use
- Store in a cool, dry place out of reach of children and pets

---

Why It Works

D-FENSE® NXT doesn't just kill what you see. It shuts down what you don't.
By sterilizing surviving insects and interrupting their development,
you eliminate not only the infestation, but the next generation too.
